

**Amendments to the Claims:**

The following listing of claims will replace all prior versions, and listings, of claims in the application:

Please cancel claims 1-3.

4. (New) A flocking machine, comprising: a needle that runs up and down through the surface and undersurface of the base cloth and has a pinhole; a hook shaft that turns in response to the vertical movement of said needle; a turning hook that is attached to said hook shaft and has the turning hook blade; and an ascending-descending blade that has a cutting blade, wherein said turning hook blade and said cutting blade slide against each other at a designated position.

5. (New) A flocking machine according to Claim 4, wherein the ascending-descending blade moves up and down by either one of the eccentric cams: an eccentric cam that is attached to the hook shaft or an eccentric cam that is attached to the cam shaft that turns in synchronization with said hook shaft.

6. (New) A flocking machine according to either Claim 4, wherein a rotary vane is attached to the hook shaft.

7. (New) A flocking machine according to either Claim 5, wherein a rotary vane is attached to the hook shaft.

8. (New) Scissors, comprising: a turning hook that has a hook, said hook comprising a sharp point and a turning hook blade; an eccentric cam; an ascending-descending blade that has a cutting blade, said ascending-descending blade oscillating by said eccentric cam;

wherein said turning hook blade of said turning hook and said cutting blade slide against each other at a designated position.

9. (New) A flocking machine that has a hook shaft and the scissors according to Claim 8, wherein a turning hook, which said scissors have, is attached to said hook shaft and additionally a rotary vane is attached to said hook shaft.
